Peter,

I have not been involved until the week of 5/17; I participated in a steering committee meeting out in Denver and made a number of comments. Presently I am an acting Branch Chief (Drinking Water and Municipal Infrastructure Branch, Division of Environmental Planning and Protection) and my involvement has been marginal, but the Regional representative is on my staff (Bruce Kiselica, Section Chief of the Drinking Water and Ground Water Protection Section, DEPP) so I have been overlooking and discussing progress with him. Give me a call if you want to talk about this process - (212) 637-3880. I would like to catch up on what is going on on your end.

Chip

"Peter Briggs"

Hi Frank & Chip,

Subject: EPA Frac Study

Hi Frank & Chip,

Yesterday we participated in an EPA run 2-hour presentation/conference call with EPA and other stakeholders on EPA's frac study. Just curious, given your knowledge & expertise with downhole operations, have either of you been asked to help with this study?

Peter
